PROFILE

PT GUNA DIESEL

# Tentang Kami

**Didirikan pada tahun 1998 di Dadap, Tangerang, PT Guna Diesel memulai perjalanannya sebagai distributor suku cadang alat pertanian. Seiring meningkatnya permintaan dari sektor pertambangan dan konstruksi, perusahaan memperluas portofolionya untuk melayani basis industri yang lebih luas. Pertumbuhan ini mendorong pendirian pabrik manufaktur sendiri, di mana perusahaan mulai memproduksi peralatan di bawah mereknya sendiri — terutama pompa pasir, yang kini melayani operasi pertambangan di seluruh Indonesia. Selama lebih dari dua dekade, perusahaan telah membangun reputasi atas peralatan yang andal dan siap pakai, didukung oleh kemampuan fabrikasi in-house mencakup pemotongan, penekukan, pembubutan, pengelasan, dan perakitan. Saat ini, PT Guna Diesel dan merek unggulannya, DICO, memasok peralatan fabrikasi besi dan suku cadang kepada distributor, kontraktor, dan operator di sektor pertambangan, pertanian, dan konstruksi.**

# About Us

Founded in 1998 in Dadap, Tangerang, PT Guna Diesel began as a distributor of agricultural equipment spare parts. As demand grew across the mining and construction sectors, the company expanded its portfolio to serve a broader industrial base. This growth led to the establishment of our own manufacturing plant, where the company began producing equipment under its own brand — most notably sand pumps, which today serve mining operations across Indonesia. Over more than two decades, the company has built a reputation for reliable, application-ready equipment backed by in-house fabrication capability across cutting, bending, lathing, welding, and assembly. Today, PT Guna Diesel and its hero brand, DICO, supply fabricated metal equipment and spare parts to distributors, contractors, and operators across the mining, agriculture, and construction industries.

## Vision

**Menjadi produsen peralatan fabrikasi industri yang paling andal di Indonesia, dipercaya oleh sektor pertambangan, pertanian, dan konstruksi atas kualitas, konsistensi, dan kemitraan operasional yang berkelanjutan.**

To be Indonesia's most reliable manufacturer of industrial fabricated equipment, trusted by the mining, agriculture, and construction sectors for quality, consistency, and operational partnership.

## Mission

**Menghadirkan peralatan fabrikasi besi dan suku cadang yang andal melalui keahlian terukur dan peningkatan berkelanjutan — sambil membangun kemitraan jangka panjang bersama pelanggan melalui pemahaman mendalam atas kebutuhan mereka, keterbukaan terhadap masukan, dan pertumbuhan bersama.**

To deliver reliable fabricated metal equipment and spare parts built through disciplined craftsmanship and continuous improvement — while building lasting customer partnerships through a deep understanding of their needs, active feedback, and shared growth.

# Our Products

**Pompa Pasir**  
**Sand Pumps**

Built for continuous heavy-duty operation in mining and dredging environments, handling high-volume slurry and sand transfer in demanding field conditions.

**Suku Cadang**  
**Spare Parts**

DICO supplies a range of spare parts for sand pumps and agricultural equipment — including bearings, shafts, impellers, and elbow pipes — ensuring dimensional consistency, field compatibility, and minimal operational downtime.

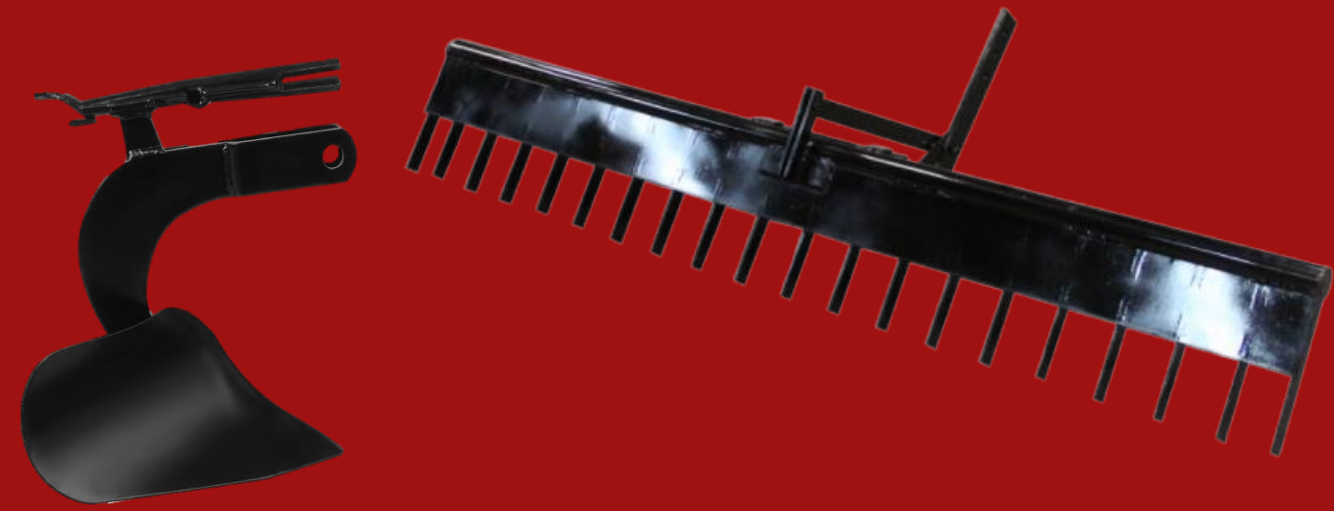

**Molen Semen**  
**Cement Mixers**

Durable cement mixers built for consistent mixing performance on active construction sites, fabricated to withstand the rigors of daily field use.

**Roda Traktor**  
**Tractor Wheels**

Purpose-built for wet field and paddy conditions, delivering the traction and structural integrity required for agricultural operations across Indonesian terrain.

### Garu & Singkal

#### Harrow & Plough

Fabricated for effective soil preparation across varied agricultural conditions, designed for compatibility with standard hand tractors widely used across Indonesia.

### Genset Diesel/Bensin

#### Diesel/Gasoline Generator

Delivers reliable mechanical power for field equipment including sand pumps and drive-dependent machinery, built for environments where consistent power output is critical.

# Capabilities

PT Guna Diesel menawarkan rangkaian produk dan solusi yang dirancang untuk memenuhi beragam kebutuhan pasar industri lokal. Fasilitas perusahaan mencakup area seluas 5.846 sqm dengan tenaga kerja lebih dari 110 karyawan dan kapasitas produksi 200 ton per bulan, mengelola seluruh proses manufaktur secara in-house.

At PT Guna Diesel, we offer a comprehensive range of products and solutions designed to meet the diverse needs of the local industrial market. Our facility spans 5846 sqm, with a workforce over 110 employees and a production capacity of 200 tons per month, the company manages the entire manufacturing process in-house.

# What we do

**PT Guna Diesel mengoperasikan fasilitas fabrikasi logam siklus penuh secara in-house di Dadap, Tangerang. Kemampuan inti meliputi pemotongan pelat besi, pembentukan, permesinan presisi, pengelasan, dan finishing — didukung oleh mesin plasma cutting CNC, mesin bubut CNC, dan mesin milling CNC. Setiap unit menjalani perakitan akhir dan inspeksi quality control sebelum pengiriman.**

PT Guna Diesel operates a full-cycle in-house fabrication facility in Dadap, Tangerang. Core capabilities include metal plate cutting, forming, precision machining, welding, and finishing — supported by CNC plasma cutting, CNC lathe, and CNC milling machines. Every unit undergoes final assembly and quality control inspection before dispatch.
